- Email WorkLife for assistance at primary care locations.
- Email WorkLife for specific hospital unit/designations

- It is the manager/supervisor’s responsibility to identify an available appropriate space and determine a break schedule. Please read our “Guidelines for Lactation Accommodation” to review the policies, procedures and resources.

- All moms must register with the UC Davis WorkLife Lactation Support Program to access and utilize the lactation rooms. The rooms provide a hospital grade pump and participants must e-sign the waiver and get on the list so they can receive instruction and on-going communications on how to access, use and effectively share the pumps and rooms.

- Once moms are on the LSP list, they are invited to free monthly support groups, educational sessions and lactation consultant appointments.

- Most rooms are dedicated lactation space and have a keypad code with privacy lock to ensure safety and proper usage of the rooms.

- Rooms should be cleaned regularly per UC Davis custodial standards for lactation rooms. Please contact Custodial Services concerning cleanliness issues with the rooms.
